

Advanced Project Management (APM)

The Advanced Project Management course focuses and integrates the critical aspects and methodologies of successful project leaders.

Through a series of realistic business decisions, constraints and issues, you achieve real world results without the real world effects of your actions.

The Advanced Project Management Course provides the associate with the advanced project management concepts and techniques essential to successfully identifying, meeting and exceeding corporate project goals and objectives. The seminar advances the Core Project Management principles and processes by developing and managing more complex case project baselines while focusing on critical leadership and facilitating project management initiation, planning, execution, control and closing processes and applications.

The course is fully aligned with the Project Management Institute's (PMI®) processes and methodologies and participants are exposed to advanced project management applications and tool utilization such as Microsoft Project.

APM features the **Virtual Leader Simulation**. This award winning program enables managers and students to become immediately more effective and productive in leading teams and working with others. With the Virtual Leader program, your managers can:

- Benchmark - their leadership styles
- Assess - their leadership skills, styles and strategies and tactics
- Practice and Learn - new skills and behaviors until they become intuitive

Learning Objectives:

- Apply Automated Tools for better project integration, scope and time management
- Reduce time to market and increase completion rate
- Online planning, scheduling, reporting and control
- Lead internal people and contractors to build high performing project teams
- Increase project team productivity and quality
- Utilize risk analysis and management
- Better communication with customers, management and staff
- Run project as a business with cost control for profitability
- Procurement, source selection and vendor management
