

Did you ever wish you could test drive a training program before you take it?

You're not alone. Today as businesses realize that a well trained, motivated employee is one of their greatest assets in achieving success, some want to know what they are getting before committing the companies money and time.

SSI has come up with the concept of a **DEMINAR**. By combining the advantages of a Demonstration (minimal time required) with the benefits of an in class Seminar (actual learning objectives) we've created an offering that allows both potential students and administrators to "test drive" our courses before you ever step foot inside a classroom.

We offer Deminars on any of the following courses all at **NO COST*** to you!

- Six Sigma Overview Workshop
- Program Management
- PMP® Certification Preparation
- Core Project Management
- Scheduling and Planning

Best of all, participants needing to maintain their PMP® Certification can earn valuable **PDU CREDITS** for attending any of the above Deminars! (*each session offers 2 credits*)

Deminars typically last 2-3 hours depending on the amount of question and answer periods during the event.

**You must pay instructor travel expenses*

For information sheets on any of the above courses, visit our website. And to schedule a Deminar at your location, call us at 877-390-3057.
